

I oppose changing the regulations regarding ownership of the media. Consolidating control of media outlets will limit the presentation of diverse points of view to only those reflecting the controlling media conglomerate. The chairman of the FC has sought to stifle comments on this issue and has been abetted by the lack of reporting by the major networks until recently. The interests of the controlling entities (Disney, AOL-Time Warner, etc) would not be served by exposing the giveaway proposed by Chairman Powell. I support regulations which support the public interest not those which serve the aggrandizement of private entities whose best interests are not necessarily those of the public.
